

9. SOFTWARE

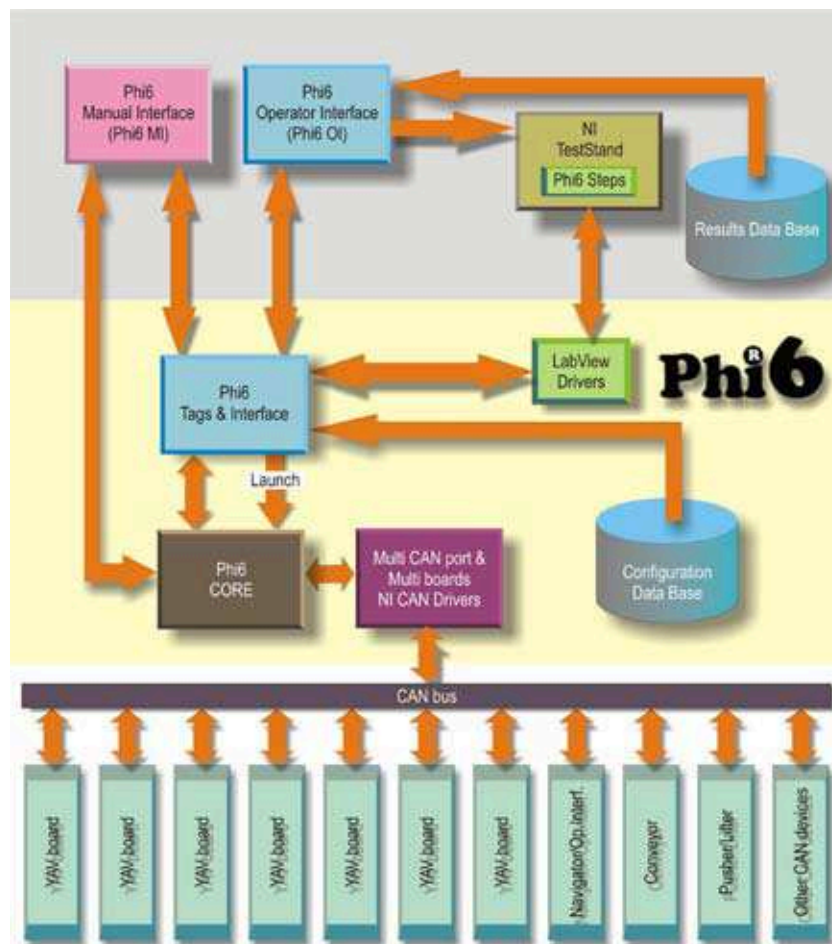

9.1 Phi6 software

- Software package to link the test executive software with all 6tl modules available (controlled through CAN bus).
- TestStand Phi6 steps included
- Operator Interface for testing platforms
- 6tl modules configuration DDBB

Phi6 software package is a powerful tool to implement the test executive software, running your application when 6tl CAN controlled modules are used.

Phi6 works independently of other software layers used: TestStand or LabView.

ORDERING INFORMATION

Phi6 software for 6tl modules management
